Gulf City Body & Trailer Works Expands Truck and Trailer Parts Inventory for Gulf Coast Fleets

August 20, 2026

Mobile, Alabama - August 20, 2026 -
Gulf City Body & Trailer Works has announced an expansion of its truck and trailer parts inventory to better support commercial fleets and independent operators across the Gulf Coast region. The Mobile, Alabama-based repair facility now stocks a broader selection of national and brand name components for trailers and fuel tanks, addressing growing demand from carriers operating throughout the Southeast.

The expanded inventory serves customers in Mobile, Fairhope, Daphne, Gulf Shores, and Pensacola, Florida, as well as surrounding communities in Louisiana, Mississippi, Georgia, and northwest Florida. The move reflects the increasing need for reliable parts availability among regional trucking operations that depend on minimizing equipment downtime.

With more than 74 years in the industry, Gulf City Body & Trailer Works maintains a facility spanning 10 acres with 50,000 square feet under roof. The location, situated adjacent to Interstate 10 approximately five miles east of the I-10 and I-65 connector, positions the company to provide parts, sales, service, and rental

support to fleets traveling major freight corridors.

The expanded parts line covers components for all makes and models of trailers, flatbeds, and fuel tankers. The inventory includes both national brands and specialty components, along with miscellaneous hardware frequently required for repair and maintenance work.

"Fleet operators along the Gulf Coast need parts on hand when equipment comes off the road, and the expanded inventory reflects that reality," said Paul Averitt from Gulf City Body & Trailer Works. "Keeping a deeper stock of components for trailers and tanks means shorter wait times and faster turnaround for the operators who keep freight moving across the region."

The company reports that demand for tanker and trailer components has increased alongside regional freight activity, prompting the decision to broaden its stock. Customers seeking specific components can contact our team of experts to confirm availability and compatibility across a range of makes and models.

"The goal has always been to provide quality parts at competitive prices with on-time delivery," Averitt said. "By carrying a wider selection under one roof, the parts department can better serve carriers throughout Alabama, Mississippi, Georgia, Louisiana, and northwest Florida."

Alongside its parts operation, Gulf City Body & Trailer Works continues to offer full-service repair and maintenance for trailers, fuel tankers, and flatbeds, as well as sales and rental of new and used trailers from established partners. The parts department operates as part of an integrated facility that also handles service and sales needs for regional customers.

Gulf City Body & Trailer Works, Inc. is a full-service repair facility based in Mobile, Alabama, specializing in the repair, maintenance, and sales of all makes and model trailers, fuel tankers, and flatbeds. The company offers new, used, and rental trailers along with an expansive line of truck and trailer parts.
